EdUp

Support and Expansion of the Ukrainian Higher Education Sector in the Area of Resources and Technology

Dear partners, researchers and teachers,

TU Bergakademie Freiberg, Lappeenranta-Lahti University of Technology, Dnipro University of Technology and Montanuniversität Leoben organize the project "EdUp – Support and Expansion of the Ukrainian Higher Education Sector in the Area of Resources and Technology". EdUp is a follow-up to the successful predecessor project SUUUpoRT, with the kind funding support of the „Stiftung Innovation Hochschullehre“. With these projects, we aim to strengthen the Ukrainian higher education system in times of crisis by offering a continuously increasing number of virtual courses in the realm of resource and technology for free usage for students and teachers.

Teacher Twins - Collaborative educational projects

We all know that not only research, but also teaching and higher education, strongly benefit from the exchange of ideas and expertise. What can be more obvious than joining brain power and create teaching projects together?

In the scope of EdUp, we therefore provide support and funding for:

- > Jointly created courses or teaching materials
- > Upscaling existing modules by integrating partner material and knowledge
- > Communication of the results of research projects in an educational context
- > Workshops and events that serve an educational purpose
- > Creativity welcome: suggest your own idea

We are happy to support teachers from all Ukrainian universities and experts from industry to be twinned with teachers from TUBAF (Germany), Lappeenranta-Lahti University of Technology (Finland) and Montanuniversität Leoben (Austria) who are willing to work together to promote cooperation in research and education.

Interested in twinning up? Easy. To get involved, just contact us via mail: support-ukraine@tu-freiberg.de and outline your ideas.

We will:

- > Match teachers and establish contact
- > Provide consulting and technical support for digital educational resources, e.g., cameras, software, and ideas
- > Financial support for activities
- > Project management and reporting
- > Help with certification and ECTS points
