für den
Masterstudiengang
Geomatics for Mineral Resource Management**

Inhaltsverzeichnis

Abkürzungen	3
Applied Remote Sensing in Geosciences	4
Applied Spatial Data Analysis and Modelling - Case Study	6
Ausgleichungsrechnung	8
Basics of Climate Change for Non-Geoecologists	9
Bodenordnung	11
Decision Support Systems	12
Deformation Analysis	13
Environmental Engineering Geology	14
Financial Management in Emerging and Developing Countries	16
Financial Reporting, Cost Accounting & Controlling	17
Geomatics for Resource and Reserve Management	18
Geomodelling – Geostatistics for Natural Resource Modelling	20
Geomonitoring	22
Grundlagen der Bodenmechanik und Angewandte Gebirgsmechanik	24
Human Resource Management and Organizational Behavior	26
Industry Internship Geomatics	27
Information Management	28
Innovation Project Geomatics	29
Introduction to Bayesian Analysis with R	31
Introduction to Earth System Science	32
Introduction to Mining	33
MSc Thesis Geomatics for Mineral Resource Management	34
Multivariate Statistics and Geostatistics	36
Operations Management	37
Ore Deposits & Economic Geology	38
Photogrammetrie	39
Project Management	40
Project Risk Management	42
Reclamation	43
Risstechnik, CAD und Geodatenbanken	44
Special Topics Geokinematics	45
Underground Mine Surveying	47

Abkürzungen

KA: schriftliche Klausur / written exam

MP: mündliche Prüfung / oral examination

AP: alternative Prüfungsleistung / alternative examination

PVL: Prüfungsvorleistung / prerequisite

MP/KA: mündliche oder schriftliche Prüfungsleistung (abhängig von Teilnehmerzahl) / written or oral examination (dependent on number of students)

SS, SoSe: Sommersemester / sommer semester

WS, WiSe: Wintersemester / winter semester

SX: Lehrveranstaltung in Semester X des Moduls / lecture in module semester x

SWS: Semesterwochenstunden

Data:	ARSG. MA. Nr. 2013 / Examination number: 30115	Version: 05.12.2018 	Start Year: WiSe 2019
Module Name:	Applied Remote Sensing in Geosciences		
(English):			
Responsible:	Benndorf, Jörg / Prof. Dr.-Ing.		
Lecturer(s):	John, André / Dr.-Ing.		
Institute(s):	Institute for Mine Surveying and Geodesy		
Duration:	1 Semester(s)		
Competencies:	After successful completion of the course students will be able to apply methods of remote sensing in the context of analysis of spatio-temporal processes in geosciences. This includes in particular, • the ability to choose suitable sensor technology based on knowledge about available sensors and related physical principles • processing of remote sensing data using typical software • application of multi-variate statistical methods to infer relevant information from sensor data, relevant to specific case studies • application of spatial modelling techniques for prediction of attributes at not samples location or times. integration of before mentioned aspects in an efficient work flow.		
Contents:	This module covers the introduction to and working on selected applications of remote sensing in geosciences by the means of selected case studies. Topics covered include • review of theoretical foundation of remote sensing • data acquisition techniques (terrestrial , airborne, spaceborne) • spatio-temporal analysis of data • geoscientific background related to the case studies. Practical exercises will be conducted applying multi-spectral and radar data for change detection of ground properties and ground deformations. Students will conduct individual project assignments and present their results.		
Literature:	Richards and Jia, Remote Sensing Digital Image Analysis, Springer Schowengerdt, Remote Sensing: Models and Methods for Image Processing, Academic Press		
Types of Teaching:	S1 (WS): Applied Remote Sensing in Geosciences / Lectures (1 SWS) S1 (WS): Applied Remote Sensing in Geosciences / Practical Application (3 SWS)		
Pre-requisites:	Recommendations: Datenanalyse/Statistik, 2011-07-27 Grundlagen der Geowissenschaften für Nebenhörer, 2014-02-03 Grundlagen der Geofernerkundung, 2017-12-19		
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: AP: Project assignment and presentation Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: AP: Projektaufgabe und Präsentation		
Credit Points:	6		

Grade:	The Grade is generated from the examination result(s) with the following weights (w): AP: Project assignment and presentation [w: 1]
Workload:	The workload is 180h. It consists of 60h supervised lecture and practical time and 120h independent work including group work, practical, self-study and preparation for examination.

Data:	ASDAMCS. MA. Nr. 529 / Examination number: 30118	Version: 05.12.2018 	Start Year: SoSe 2020
Module Name:	Applied Spatial Data Analysis and Modelling - Case Study		
(English):			
Responsible:	Benndorf, Jörg / Prof. Dr.-Ing.		
Lecturer(s):	Benndorf, Jörg / Prof. Dr.-Ing. John, André / Dr.-Ing.		
Institute(s):	Institute for Mine Surveying and Geodesy		
Duration:	1 Semester(s)		
Competencies:	After successful completion of the course, students are able to: • independently create solutions for complex practical problems in mining and geoengineering applying knowledge about mine surveying, mining engineering, geotechnical engineering and engineering geology, utilizing modern methods in geospatial data analysis, geo-modelling and GIS, • critically assess and interpreted results of the analysis and provide recommendations related to expected impact of mining activities during active and post-mining phase, • coordinate team work, create project plans and manage the work progress, • present results in a report and/or a presentation to a panel of independent experts, conduct auto-didactical education related to detailed handling of typical software.		
Contents:	• project work on a case study related to after mine care • supporting acquisition of georeferenced data • impact analysis on environment and safety • data base structures suited to map the problem on hand • GIS project management • interpolation, 2½- and 3D model building • geospatial data analysis • network analysis • client/server concepts • GIS and internet presentation of results in thematic maps and presentations

Types of Teaching:	S1 (SS): Applied Spatial Data Analysis and Modelling for After Mine Care - Case Study - Lectures / Lectures (1 SWS) S1 (SS): Applied Spatial Data Analysis and Modelling for After Mine Care		

	- Case Study - Practical exercises / Practical Application (2 SWS)
Pre-requisites:	Recommendations: Allgemeine Grundlagen im Markscheidewesen, 2018-01-11 Grundlagen der Geoinformationssysteme, 2014-06-16
Frequency:	yearly in the summer semester
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: MP*: Oral examination [30 min] AP*: Report on project * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: MP*: Mündliche Prüfung [30 min] AP*: Projektbericht * Bei Modulen mit mehreren Prüfungsleistungen muss diese Prüfungsleistung bestanden bzw. mit mindestens "ausreichend" (4,0) bewertet sein.
Credit Points:	5
Grade:	The Grade is generated from the examination result(s) with the following weights (w): MP*: Oral examination [w: 2] AP*: Report on project [w: 3] * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively.
Workload:	The workload is 150h. It consists of 45h lectures 105h independent work including group work, practical, self-study and preparation for examination.

Daten:	AUSGLR. BA. Nr. 635 / Prüfungs-Nr.: 33803	Stand: 30.06.2023 	Start: SoSe 2019
Modulname:	Ausgleichsrechnung		
(englisch):	Adjustment Theory		
Verantwortlich(e):	Benndorf, Jörg / Prof. Dr.-Ing.		
Dozent(en):	John, André / Dr.-Ing.		
Institut(e):	Institut für Markscheidewesen und Geodäsie		
Dauer:	1 Semester		
Qualifikationsziele / Kompetenzen:	Die Studierenden erlangen Verständnis für die sachgerechte Anwendung der Fehlertheorie bei der Auswertung und für die Planung von Messeinsätzen. Sie können Vermessungskonzepte unter Genauigkeitsaspekten analysieren, grobe Fehler erkennen und wissen mit typischen systematischen Messabweichungen umzugehen. Sie können die Ausgleichsrechnung für die optimale Auswertung überbestimmter geodätischer Messungen unter Nutzung einschlägiger Software sowie für individuelle Ingenieuraufgaben praktisch handhaben. Sie beherrschen Schätzverfahren u. Interpretation von Genauigkeitsangaben sicher. Sie können die Genauigkeit zu erwartender oder beobachteter Messungen bewerten.		
Inhalte:	• Fehlerlehre ◦ Fehlerarten ◦ Genauigkeitsmaße von Geodaten ◦ Korrelation ◦ Fehlerfortpflanzung • Ausgleichung direkter und vermittelnder Beobachtungen mit und ohne Bedingungen zwischen den Unbekannten • Ausgleichung korrelierter Beobachtungen • Aufstellen von Beobachtungsgleichungen und deren Linearisierung • Berechnung von Genauigkeitsmaßen • Zuverlässigkeit geodätischer Netze ◦ Redundanz ◦ innere und äußere Zuverlässigkeit		
Typische Fachliteratur:	Niemeier, W.: Ausgleichsrechnung. Berlin [u.a.] Fröhlich, H.: Computerunterstützte Übungen zur Ausgleichsrechnung Reißmann, G.: Die Ausgleichsrechnung		
Lehrformen:	S1 (SS): Vorlesung (2 SWS) S1 (SS): Übung (2 SWS)		
Voraussetzungen für die Teilnahme:	Empfohlen: Fähigkeit und Möglichkeit zur Erstellung einfacher Computerprogramme ist notwendig. Empfohlen wird die vorherige Teilnahme an Einführungskursen in "Mathematica".		
Turnus:	jährlich im Sommersemester		
Voraussetzungen für die Vergabe von Leistungspunkten:	Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: MP [20 min] PVL: Belege PVL müssen vor Prüfungsantritt erfüllt sein bzw. nachgewiesen werden.		
Leistungspunkte:	5		
Note:	Die Note ergibt sich entsprechend der Gewichtung (w) aus folgenden(r) Prüfungsleistung(en): MP [w: 1]		
Arbeitsaufwand:	Der Zeitaufwand beträgt 150h und setzt sich zusammen aus 60h Präsenzzeit und 90h Selbststudium. Letzteres umfasst die Bearbeitung der Übungsaufgaben und der Prüfungsvorbereitung.		

Data:	BCCNG. MA. Nr. 3700 / Examination number: 31026	Version: 25.09.2019 	Start Year: WiSe 2019
Module Name:	Basics of Climate Change for Non-Geoecologists		
(English):			
Responsible:	Jackisch, Conrad / JProf		
Lecturer(s):	Zimmermann, Frank / Dr. Jackisch, Conrad / JProf		
Institute(s):	Institute of Mineralogy Institute of Drilling Engineering and Fluid Mining		
Duration:	1 Semester(s)		
Competencies:	Specific aims: Successful students can: • Understand physical and chemical basics of the climate systems with important feedback mechanisms. • Evaluate the key drivers of climate variability on various temporal and spatial scales. • Use palaeoclimatological knowledge and apply this to current and future climate development. • Judge insecurities related to climate observations and projections and apply this understanding to evaluate climate mitigation and adaptation strategies. • Deal with challenges derived from extreme weather and climate events. • Critically reflect and evaluate media reports on climate change and results from scientific studies. Additional competencies: • Compile scientific results and present them in front of experts. • Discuss pro's and con's in climate-change related debates and moderate scientific discussions.		
Contents:	Climate Change: Participants receive up-to-date information on climate change issues (global and regional, mainly physical and chemical aspects), on mitigation and adaptation, on model and scenario comparison, and on handling of uncertainties.		
Literature:	Burroughs (2007) Climate change – a multidisciplinary approach Dessler (2011) Introduction to modern climate change Dessler & Parson (2010) The science and politics of global climate change Neelin (2010) Climate change and climate modelling Richardson, Steffen, Liverman (2011) Climate change: global risks, challenges and decisions Hulme (2009) Why we disagree about climate change: understanding controversy, inaction and opportunity		
Types of Teaching:	S1 (WS): Lectures (2 SWS) S1 (WS): Seminar (1 SWS)		
Pre-requisites:	Recommendations: B.Sc. in Geoecology (or related successful B.Sc. degree). Sufficient experience with English.		
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains:		

	KA [90 min] AP: Performance in the exercises and student paper
	Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min] AP: Übungsbeitrag und Studienarbeit
Credit Points:	5
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 1] AP: Performance in the exercises and student paper [w: 2]
Workload:	The workload is 150h. It is the result of 45h attendance and 105h self-studies. The latter involves learning of lecture material and the exercises, as well as working on the student paper.

Daten:	BO. BA. Nr. 1009 / Prüfungs-Nr.: 33810	Stand: 12.09.2017 	Start: SoSe 2019
Modulname:	Bodenordnung		
(englisch):	Town and Country Planning		
Verantwortlich(e):	Benndorf, Jörg / Prof. Dr.-Ing.		
Dozent(en):	Portsch, Anja / Dipl.-Ing. Verm.Ass.		
Institut(e):	Institut für Markscheidewesen und Geodäsie		
Dauer:	1 Semester		
Qualifikationsziele / Kompetenzen:	Die Studierenden kennen die Techniken der Bodenbewirtschaftung, der Bodenordnung und der Bodenbewertung, sie können diesbezügliche Aufgabenstellungen lösen, Lösungswege fachlich vertreten und gegenüber Dritten verbal oder in schriftlicher Form verteidigen.		
Inhalte:	Das Eigentum: Art 14 GG. Grundlagen der Wertermittlung (Begriffe, Gutachterausschuss, Kaufpreissammlung, u. a.), Wertermittlungsverfahren national und international, Bodenrichtwerte, Bewertung von dinglichen Rechten; Instrumente der Dorf- und Stadtentwicklung; Instrumente und Verfahren der Bodenordnung in Stadt (nach BauGB) und im ländlichen Raum (nach FlurbG), Bauordnungen und Bauvorlagen;		
Typische Fachliteratur:	BauGB, FlurbG, VwVfG, VwGO, GBR, BGB, SW-RL, WertR, NKR		
Lehrformen:	S1 (SS): Vorlesung (2 SWS) S1 (SS): Übung (1 SWS)		
Voraussetzungen für die Teilnahme:	Obligatorisch: Raumplanung und Liegenschaftskataster, 2017-09-12 Diese Voraussetzung gilt nicht für den Masterstudiengang Geomatics Empfohlen: Vorkenntnisse öffentliches und privates Recht		
Turnus:	alle 2 Jahre im Sommersemester		
Voraussetzungen für die Vergabe von Leistungspunkten:	Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: MP [20 min] AP: Belegarbeit		
Leistungspunkte:	4		
Note:	Die Note ergibt sich entsprechend der Gewichtung (w) aus folgenden(r) Prüfungsleistung(en): MP [w: 2] AP: Belegarbeit [w: 1]		
Arbeitsaufwand:	Der Zeitaufwand beträgt 120h und setzt sich zusammen aus 45h Präsenzzeit und 75h Selbststudium. Letzteres umfasst die Vor- und Nachbereitung der Lehrveranstaltung und die Prüfungsvorbereitung.		

Data:	EU. MA. Nr. 2966 / Examination number: 60509	Version: 25.05.2016 	Start Year: SoSe 2011
Module Name:	Decision Support Systems		
(English):			
Responsible:	Felden, Carsten / Prof. Dr.		
Lecturer(s):	Felden, Carsten / Prof. Dr.		
Institute(s):	Institute of IManagement Information Systems		
Duration:	1 Semester(s)		
Competencies:	The lecture held in English language provides a widespread overview concerning the support of decision making from a theoretical and practical point of view. The theoretical basis comprises the System and Decision Theory as well as Business Intelligence. The practical point of view will be illustrated with the help of the demands of the energy sector. The individual situations lead to numerous concepts, methods and algorithms of decision making support. The practically relevant examples are meant to support the students theoretical and practical understanding of the system theory based context of support in decision making. This should qualify them to use the right methods and tools (methods and models) in real life situations.		
Contents:	1. Systems theory 2. Decision theory 3. Behavioristical methods 4. Models and methods of decision support		
Literature:	Gluchowski, P.; Gabriel, R.; Chamoni, P. (1997): Management Support Systeme Computergestützte Informationssysteme für Führungskräfte und Entscheidungsträger, Berlin et al.: Springer Turban, E.; J.E. Aronson; T.-P. Liang (2004): Decision Support Systems and Intelligent Systems, 7th ed. Upper Saddle River, N.J.: Prentice Hall Luger, G. F. (2004): Artificial Intelligence - Structures and Strategies for Complex Problem Solving, 5th ed. Reading Massachusetts: Addison-Wesley Sprague, Ralph; Watson, Hugh (1996): Decision Support for management, Prentice Hall		
Types of Teaching:	S1 (SS): Lectures (2 SWS) S1 (SS): Exercises (2 SWS)		
Pre-requisites:			
Frequency:	yearly in the summer semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA [90 min] PVL: Case Study PVL have to be satisfied before the examination. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min] PVL: Fallstudie PVL müssen vor Prüfungsantritt erfüllt sein bzw. nachgewiesen werden.		
Credit Points:	6		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 1]		
Workload:	The workload is 180h. It is the result of 60h attendance and 120h self-studies. The private studies consist of preparation and repetition for/of lectures and tutorials as well as the preparation for the exam.		

Data:	DEFAN / Examination number: 30415	Version: 06.10.2019 	Start Year: WiSe 2020
Module Name:	Deformation Analysis		
(English):			
Responsible:	Nagel, Thorsten / Prof. Dr.		
Lecturer(s):	Kroner, Uwe / PD Dr. Schneider, Susanne / Dr.		
Institute(s):	Institute of Geology		
Duration:	1 Semester(s)		
Competencies:	Understanding of key techniques of structural analysis. Familiarization and critical analysis of the recent structural geology research literature.		
Contents:	Paleostress, strain, vorticity, and balanced cross-section analysis and variable topics in the research literature.		
Literature:	Publications in international journals; Twiss & Moores (2006) Structural Geology; Ramsay & Huber (1983, 1987) and Ramsay & Lisle (2002) Techniques of Modern Structural Geology; Woodward et al. (1989) Balanced Geological Cross-Sections		
Types of Teaching:	S1 (WS): Deformation analysis / Lectures (2 SWS) S1 (WS): Balanced cross section construction / Exercises (1 SWS) S1 (WS): Deformation analysis / Seminar (1 SWS)		
Pre-requisites:			
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: MP/KA (KA if 5 students or more) [MP minimum 30 min / KA 90 min] Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: MP/KA (KA bei 5 und mehr Teilnehmern) [MP mindestens 30 min / KA 90 min]		
Credit Points:	6		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): MP/KA [w: 1]		
Workload:	The workload is 180h. It is the result of 60h attendance and 120h self-studies. The time required is 95 hours (30 hours attendance time and 65 hours self-study, i.e. preparation of exercises, seminars, and exams).		

Data:	EEG MA Nr. 2035 / Examination number: 35705	Version: 28.01.2020 	Start Year: WiSe 2020
Module Name:	Environmental Engineering Geology		
(English):			
Responsible:	Butscher, Christoph / Prof. Dr.		
Lecturer(s):	Butscher, Christoph / Prof. Dr.		
Institute(s):	Institute of Geotechnics		
Duration:	2 Semester(s)		
Competencies:	Students become familiar with topics of environmental geotechnics. They know the relevance and consequences of abandoned contaminated sites, waste disposal and old mining. They understand the respective processes and can discuss and plan mitigation measures. They can scientifically present topics in the area of old mining. They can prepare survey reports of legacy contamination and of stability analyses including risk assessment and proposal of mitigation measures.		
Contents:	<u>Legacy contamination and soil remediation</u> : Introduction to legacy contamination; legal basics; assessment of abandoned contaminated sites; properties of typical contaminants; soil remediation techniques; post-rehabilitation maintenance; land recycling; legacy contamination in Saxony; preparation of a survey report. <u>Waste disposal</u> : scientific fundamentals; legal framework; geological-hydrogeological aspects of construction and operation of landfills, industrial sedimentation basins and deep geological repositories; computer-aided stability analysis; preparation of a geotechnical report. <u>Old mining</u> : legal framework; exploration methods; methods of assessment, remediation and securing; regional topics in Saxony (lignite open pits, uranium mining); water management of flooded underground mines; international case studies.		
Literature:	Suthersan et al. (2017): Remediation Engineering. CRC Press, Boca Raton Daniel (ed.) (1993): Geotechnical Practice for Waste Disposal. Chapman & Hall, London		
Types of Teaching:	S1 (WS): Legacy contamination and soil remediation / Lectures (1 SWS) S1 (WS): Legacy contamination and soil remediation / Exercises (1 SWS) S2 (SS): Waste disposal / Lectures (1 SWS) S2 (SS): Waste disposal / Exercises (1 SWS) S2 (SS): Old mining / Lectures (1 SWS) S2 (SS): Old mining / Exercises (1 SWS) The order of the module semesters is flexible.		
Pre-requisites:			
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA* [120 min] AP*: Homework (includes two reports and one presentation) * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA* [120 min] AP*: Aufgaben (incl. Berichte und Präsentation) * Bei Modulen mit mehreren Prüfungsleistungen muss diese		

	Prüfungsleistung bestanden bzw. mit mindestens "ausreichend" (4,0) bewertet sein.
Credit Points:	8
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA* [w: 1] AP*: Homework (includes two reports and one presentation) [w: 1] * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively.
Workload:	The workload is 240h. It is the result of 90h attendance and 150h self-studies.

Data:	Examination number: 60811	Version: 23.01.2020 	Start Year: SoSe 2020
Module Name:	Financial Management in Emerging and Developing Countries		
(English):			
Responsible:	Horsch, Andreas / Prof. Dr. Kunerts, Sophie		
Lecturer(s):			
Institute(s):	Professor of Investment and Finance		
Duration:	1 Semester(s)		
Competencies:	Students learn to detect and evaluate differences (and common features) of corporate finance in developing and emerging countries on the one hand and industrialized countries on the other hand and to understand how selected corporate finance options help to overcome the particular challenges of the former markets.		
Contents:	1. Peculiarities of financial markets in developing and emerging countries 2. Basics of Financial Risk Management 3. Financial Intermediation 4. Microfinance 5. Project Finance 6. Case Studies of Banking and Finance in Selected Emerging Markets		
Literature:	Ashta (2011): Advanced Technologies for Microfinance. Advances in Finance, Accounting, and Economics, 1 st ed., Heshey; Besley / Brigham (2015): Principles of finance, 6 th ed., Mason; Brealey / Myers / Allen (2019): ISE Principles of Corporate Finance, 13 th ed., McGraw-Hill Education Ltd; Damodaran (2014): Applied corporate finance, 4 th ed., Hoboken; Gatti: (2018): Project Finance in Theory and Practice: Designing, Structuring, and Financing Private and Public Projects, 3 rd ed., Academic Press; Hillier / Grinblatt / Titman (2011): Financial markets and corporate strategy, 2 nd ed., McGraw-Hill Education Ltd; Ledgerwood / Earne / Nelson (2013): The new microfinance handbook: A financial market system perspective, 2 nd ed., The World Bank; Cornett / Saunders (2017): Financial institutions management: A risk management approach, 9 th ed., McGraw-Hill/Irwin; Kawai / Prasad (2008): Financial market regulation and reforms in emerging markets, 1 st ed., . Types of Teaching:	S1 (SS): Lectures / Lectures (2 SWS) S1 (SS): Tutorials / Exercises (2 SWS)		
Pre-requisites:			
Frequency:	yearly in the summer semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA [90 min] Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min]		
Credit Points:	6		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 1]		
Workload:	The workload is 180h. It is the result of 60h attendance and 120h self-studies.		

Data:	COSTAC. MA. Nr. 3497 / Examination number: 60619	Version: 29.04.2019 	Start Year: WiSe 2010
Module Name:	Financial Reporting, Cost Accounting & Controlling		
(English):			
Responsible:	Sopp, Karina / Prof. Dr.		
Lecturer(s):	Sopp, Karina / Prof. Dr.		
Institute(s):	Professor of Entrepreneurship and Corporate Taxation		
Duration:	1 Semester(s)		
Competencies:	Students will be enabled to prepare (consolidated) financial statements according to IFRS (International Financial Reporting Standards) and to apply different methods of cost accounting and controlling to provide the management with guidance for operational and strategic decisions.		
Contents:	• Requirements to prepare (consolidated) financial statements; • IFRS: Main principles; • Evaluation and recognition regulations according to IFRS; • Cost Accounting and Controlling.		
Literature:	Horngren, C.; Bhimani, A., et al. (2007): Management and Cost Accounting, New Jersey. Horngren, C.; Foster, G.; et al. (2008): Cost Accounting, New Jersey.		
Types of Teaching:	S1 (WS): Lectures (1 SWS) S1 (WS): Exercises (1 SWS)		
Pre-requisites:	Recommendations: No previous knowledge is required.		
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA [90 min] Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min]		
Credit Points:	3		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 1]		
Workload:	The workload is 90h. It is the result of 30h attendance and 60h self-studies.		

Data:	MARKLAG. BA. Nr. 648 / Examination number: 30117	Version: 05.12.2018 	Start Year: SoSe 2020
Module Name:	Geomatics for Resource and Reserve Management		
(English):			
Responsible:	Benndorf, Jörg / Prof. Dr.-Ing.		
Lecturer(s):	Benndorf, Jörg / Prof. Dr.-Ing.		
Institute(s):	Institute for Mine Surveying and Geodesy		
Duration:	1 Semester(s)		
Competencies:	After successful completion of the course, students are able to create case specific work flows and apply methods that support a safe, economical end environmental responsible exploitation of mineral deposits. The particular focus of this module is on: - exploration of the resource and geo-mechanical aspects including tectonics, - evaluation of mineral resources and reserves according international standards, - monitoring of operational accessible reserves (in-pit reserves), - grade control and reconciliation, - operational production and safety monitoring and - aspects related to optimization of mine design.		
Contents:	• methods and phases of resource exploration • resource/reserve estimation and international standards for reporting • operational production and safety monitoring • grade control and reconciliation • tectonic structures and its visualization in mine maps (folding structures and discontinuities) • geotechnical design aspects • applied operations resource for optimized mine design

Types of Teaching:	S1 (SS): Geomatics for Resource and Reserve Management - Lectures / Lectures (2 SWS) S1 (SS): Geomatics for Resource and Reserve Management - Exercises and practical work in groups / Practical Application (2 SWS)		
Pre-requisites:	Recommendations: Risstechnik, CAD und Geodatenbanken, 2017-11-14		
Frequency:	yearly in the summer semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: MP [30 min] PVL: Excursion report, set of assignments incl. presentation PVL have to be satisfied before the examination. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: MP [30 min] PVL: Exkursionsbericht, Hausarbeit incl. Präsentation PVL müssen vor Prüfungsantritt erfüllt sein bzw. nachgewiesen werden.		

Credit Points:	6
Grade:	The Grade is generated from the examination result(s) with the following weights (w): MP [w: 1]
Workload:	The workload is 180h. It consists of 60h presence time (lectures and underground surveying practical), and 120 hours independent work including group work, practical, self-study and preparation for examination.

Data:	Geomod. MA. Nr. 638 / Examination number: 30114	Version: 05.12.2018 	Start Year: WiSe 2019
Module Name:	Geomodelling - Geostatistics for Natural Resource Modelling		
(English):			
Responsible:	Benndorf, Jörg / Prof. Dr.-Ing.		
Lecturer(s):			
Institute(s):	Institute for Mine Surveying and Geodesy		
Duration:	1 Semester(s)		
Competencies:	After successful completion of the course, students are able to: - explain the theoretical foundation of spatial data analysis, geostatistical model building and estimation, - apply geostatistical methods in the context of estimating natural resources/reserves, - critically evaluate model assumptions of different estimation and simulation method and choose suitable methods for specific applications, - discuss the critical character of the SMU-size to recoverable reserves, - conduct a resource/reserve estimation in a simple case study.		
Contents:	Importance of Resource Modelling and Estimation in the Value Chain of Mining, Uni-variate and Multi-variate Explorative Data Analysis, Analysis of Spatial Continuity, the Spatial Random Function Model, Model Assumptions of Stationarity and Ergodicity, Inference of a Spatial Random Function using unbiased Estimators, Dealing with Preferential Sampling, Variography and Variogram Modeling, Simple Methods for Spatial Estimation including the Polygon Method, Triangulation, Inverse Distance Power and Polynomial Regression, Geostatistical Methods for Spatial Estimation including Simple Kriging, Ordinary Kriging and Universal Kriging, Integrating Secondary Information into Spatial Modeling using Techniques of Co-Kriging, other methods including Indicator Kriging and Block Kriging, Introduction in Modeling spatial Uncertainty using Conditional Simulation, the Method of Sequential Gaussian Simulation, Geostatistical Considerations in Estimating Reserves in Terms of Volume-Variance Relationship for defining Smallest Movable Units and Grade Tonnage Curves, Applications in Mining Cases, Introduction to CRIRSCO-based International Reporting standards (example JORC Code).		
Literature:	M. Armstrong: "Basic Linear Geostatistics", Springer Verlag; H. Akin, H. Siemes: „Praktische Geostatistik“, Springer Verlag; A. G. Journel, and C.J. Huijbregts, 1978, Mining Geostatistics, Academic Press; P. Goovaerts: "Geostatistics for Natural Resource Evaluation", Oxford University Press; T. Schafmeister: "Geostatistik für die hydrogeologische Praxis", Springer Verlag		
Types of Teaching:	S1 (WS): Geomodelling - Geostatistics for natural resource modelling - Lecture / Lectures (2 SWS) S1 (WS): Geomodelling - Geostatistics for natural resource modelling - Practical work in the computer lab / Practical Application (2 SWS)		
Pre-requisites:	Recommendations: Angewandte Statistik, 2021-11-22 Infinitesimalrechnung, An introductory course in statistics.		
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA* [90 min]		

	AP*: Set of assignments * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA* [90 min] AP*: Hausarbeiten * Bei Modulen mit mehreren Prüfungsleistungen muss diese Prüfungsleistung bestanden bzw. mit mindestens "ausreichend" (4,0) bewertet sein.
Credit Points:	5
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA* [w: 2] AP*: Set of assignments [w: 1] * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively.
Workload:	The workload is 150h. It consists of 60h presence time (lectures and practical), and 90 hours independent work including group work, practical, self-study and preparation for examination.

Data:	GEOMON. BA. 128 / Examination number: 33002	Version: 05.12.2018 	Start Year: WiSe 2019
Module Name:	Geomonitoring		
(English):			
Responsible:	Benndorf, Jörg / Prof. Dr.-Ing.		
Lecturer(s):	Benndorf, Jörg / Prof. Dr.-Ing. John, André / Dr.-Ing.		
Institute(s):	Institute for Mine Surveying and Geodesy		
Duration:	1 Semester(s)		
Competencies:	Students are able to build on their knowledge about geodetic and geotechnical measurement methods on the one hand and their understanding about the geogenic/ antropogenic process to monitor on the other hand to generate reliable and effective monitoring concepts for spatial, temporal and spatio-temporal processes. Students are able to critically analyze monitoring concepts and interpret monitoring results.		
Contents:	The lecture introduces to applications and to the methodological approach of geomonitoring. Starting on the basis of measurement and data acquisition techniques it discusses monitoring design aspects and statistical and model based inference strategies. The aim is to infer an understanding of geo-processes and their relevant spatio-temporal dynamics, including change detection. Topical application in the context of resource extraction impact- and environmental impact monitoring on different scales in time and space will be discussed and analyzed.		
Literature:	Kavanagh, B.F. (2002): Geomatics. Pearson Education, Upper Saddle River; Jain, R. (2015). Environmental Impact of Mining and Mineral Processing: Management, Monitoring, and Auditing Strategies. Butterworth-Heinemann. Fischer-Stabel, P. (2005): Umweltinformationssysteme. Wichmann, Heidelberg. de Gruijter, J., Brus, D.J., Bierkens, M.F.P., Kotters, M.(2006). Sampling for Natural Resources. Springer.		
Types of Teaching:	S1 (WS): Geomonitoring - Lecture / Lectures (2 SWS) S1 (WS): Geomonitoring - Practical exercises / Practical Application (2 SWS)		
Pre-requisites:	Recommendations: Geomodellierung, 2018-01-11 Grundlagen der Geoinformationssysteme, 2014-06-16 Allgemeine Grundlagen der Vermessungs- und Instrumententechnik, 2023-06-30 Ingenieurgeodäsie, 2017-09-13 Grundlagen der Geofernerkundung, 2017-12-19 Ingenieurvermessung		
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: MP [30 min] PVL: Project report PVL have to be satisfied before the examination. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: MP [30 min]		

	PVL: Projektbericht PVL müssen vor Prüfungsantritt erfüllt sein bzw. nachgewiesen werden.
Credit Points:	5
Grade:	The Grade is generated from the examination result(s) with the following weights (w): MP [w: 1]
Workload:	The workload is 150h. It consists of 60h supervised lecture and practical time and 90h independent work including group work, practical, self-study and preparation for examination.

Daten:	BGM. BA. Nr. 640 / Prüfungs-Nr.: 32404	Stand: 03.05.2016 	Start: WiSe 2015
Modulname:	Grundlagen der Bodenmechanik und Angewandte Gebirgsmechanik		
(englisch):	Fundamentals of Soil Mechanics and Applied Rock Mechanics		
Verantwortlich(e):	Konietzky, Heinz / Prof. Dr.-Ing. habil.		
Dozent(en):	Konietzky, Heinz / Prof. Dr.-Ing. habil. Nagel, Thomas / Prof. Dr. Rosenzweig, Tino / Dr.-Ing.		
Institut(e):	Institut für Geotechnik		
Dauer:	1 Semester		
Qualifikationsziele / Kompetenzen:	Studierende erlangen grundlegendes Fachwissen des geotechnischen Ingenieurwesens auf dem Gebiet der Bodenmechanik und der Gebirgsmechanik. Die Studierenden werden befähigt geotechnische Sachverhalte und die in der Geotechnik angewendeten Methoden zu verstehen und zu bewerten. Weiterhin werden die Studierenden in die Lage versetzt, einfache geotechnische Sachverhalte selbst zu berechnen bzw. abzuschätzen.		
Inhalte:	Bodenmechanik Grundlagen: • Spannungszustände in Lockergesteinen • Wasserströmung in Lockergesteinen • Konsolidationstheorie • Bruchzustände in Lockergesteinen • Aktiver und passiver Erddruck • Standsicherheit von Böschungen Angewandte Gebirgsmechanik: • Kennenlernen der Grundbegriffe der Geomechanik inklusive deren mathematischen bzw. geometrischen Darstellung • Vermittlung gebirgs- und felsmechanischer Grundlagen zur Bewertung gebirgsmechanischer Erscheinungen • Verformungs- und Festigkeitseigenschaften von Gesteinen und geklüftetem Gebirge • Gebirgsklassifikationen • Sekundäre Spannungszustände für verschiedene Querschnittsformen unterirdischer Hohlräume und Ursachen für Brucherscheinungen unter der Mitwirkung von Trennflächen (Klüftung, Schichtung, Schieferung)		
Typische Fachliteratur:	Möller, G.: Grundbau und Bodenmechanik. 2017. ISBN: 978-3-433-03176-6 Kempfert, H.G., Lüking, J.: Geotechnik nach Eurocode. Band 1+2. 2020. ISBN: 978-3-410-28843-5; Grundbau Taschenbuch, Teil I-III, Ernst-Sohn-Verlag, 2018; Einschlägige Normung DIN/EN/ISO; Jaeger J.C. et al.: Fundamentals of Rock Mechanics, Blackwell Publ., 2007; Brady & Brown: Rock Mechanics for Underground Mining, Kluwer Academic Publishers, 2004; Hudson u. a.: Comprehensive Rock Engineering, Pergamon Press, Oxford, 1993 E-Book: Lehrstuhl Felsmechanik		
Lehrformen:	S1 (WS): Vorlesung (4 SWS) S1 (WS): Übung (2 SWS)		

Voraussetzungen für die Teilnahme:	Empfohlen: Theoretische Grundlagen der Geomechanik, 2014-03-21 Mechanische Eigenschaften der Festgesteine, 2014-03-21 Mechanische Eigenschaften der Lockergesteine, 2011-07-29
Turnus:	jährlich im Wintersemester
Voraussetzungen für die Vergabe von Leistungspunkten:	Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA*: Bodenmechanik Grundlagen [90 min] KA*: Angewandte Gebirgsmechanik [90 min] * Bei Modulen mit mehreren Prüfungsleistungen muss diese Prüfungsleistung bestanden bzw. mit mindestens "ausreichend" (4,0) bewertet sein.
Leistungspunkte:	6
Note:	Die Note ergibt sich entsprechend der Gewichtung (w) aus folgenden(r) Prüfungsleistung(en): KA*: Bodenmechanik Grundlagen [w: 1] KA*: Angewandte Gebirgsmechanik [w: 1] * Bei Modulen mit mehreren Prüfungsleistungen muss diese Prüfungsleistung bestanden bzw. mit mindestens "ausreichend" (4,0) bewertet sein.
Arbeitsaufwand:	Der Zeitaufwand beträgt 180h und setzt sich zusammen aus 90h Präsenzzeit und 90h Selbststudium. Letzteres umfasst die Vor- und Nachbereitung der Lehrveranstaltung und die Prüfungsvorbereitung.

Data:	HRMOB. MA. Nr. 3203 / Examination number: 61008	Version: 14.02.2017 	Start Year: SoSe 2011
Module Name:	Human Resource Management and Organizational Behavior		
(English):			
Responsible:	Stumpf-Wollersheim, Jutta / Prof. Dr. rer. pol.		
Lecturer(s):	Stumpf-Wollersheim, Jutta / Prof. Dr. rer. pol.		
Institute(s):	International Management and Strategy		
Duration:	1 Semester(s)		
Competencies:	The primary objective of this course is to help you learn to diagnose management situations so that you will be able to transfer this skill to your working world. Specific objectives of the course include: 1. Understanding the relevance of human resources for organizations and the key concepts of human behavior in organizations. 2. Appreciating how the human side of management is an essential complement to the technical skills you are learning in other courses. 3. Learning concepts and approaches that will enable you to analyze HR- and organizational problems and to develop appropriate solutions. 4. Developing the knowledge and skills you need to be a successful manager of yourself and others.		
Contents:	1. Introduction 2. Organizational Behavior (OB) 2.1 Individual level (foundations of individual behavior; impacts of individual characteristics; impact of situational factors) 2.2 Group level (foundations of group behavior, understanding work teams; group processes e.g., learning in teams) 2.3 Leadership 3. Human Resource Management (HRM) 3.1 Changing Nature of HRM 3.2 HRM Planning 3.3 Human Resource Adjustments 3.4 Training and Developing HR 3.5 Compensating HR Presentations and Conclusions		
Literature:	Mathis, R.L.; Jackson, J.H.: „Human Resource Management“, South Western College Publishing: Cincinnati 2006 Judge, T.A.; Robbins, S.P.: „Organizational Behavior“, Pearson Prentice Hall: Upper Saddle River, N.J. 2016		
Types of Teaching:	S1 (SS): Lectures (2 SWS)		
Pre-requisites:	Recommendations: None		
Frequency:	yearly in the summer semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA: Final test [90 min] Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA: Abschlussklausur [90 min]		
Credit Points:	3		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA: Final test [w: 1]		
Workload:	The workload is 90h. It is the result of 30h attendance and 60h self-studies.		

Data:	InternGeom. MA. Nr. 3660 / Examination number: 30121	Version: 05.12.2018 	Start Year: WiSe 2019
Module Name:	Industry Internship Geomatics		
(English):			
Responsible:	Benndorf, Jörg / Prof. Dr.-Ing.		
Lecturer(s):			
Institute(s):	Institute for Mine Surveying and Geodesy		
Duration:	1 Semester(s)		
Competencies:	Students will apply their gained knowledge in practical tasks during an industry internship in a geomatic-oriented enterprise, consultant company, public authority or similar institutions institution. Students will deepen their understanding of the business context of their subject, and develop cross-disciplinary and interpersonal skills.		
Contents:	The internship contains of: • 20 days practical work in a company or related institution, • regular consultations with the university supervisor, • a short and consistent internship report, • an evaluation talk with the supervisor. The organization of an internship is in the responsibility of the student. The supervisor has to agree upfront, if the organized internship is suitable for this module.		
Literature:	n.a.		
Types of Teaching:	S1: Practical work in an enterprise, consulting company, public authority or similar institution (20 days) / project		
Pre-requisites:			
Frequency:	constantly		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: AP*: Written report and evaluation discussion No grading. * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: AP*: Praktikumsbericht und Praktikumsdiskussion Es wird keine Note vergeben. * Bei Modulen mit mehreren Prüfungsleistungen muss diese Prüfungsleistung bestanden bzw. mit mindestens "ausreichend" (4,0) bewertet sein.		
Credit Points:	5		
Grade:	The examination results are not rated. The credits are given when the exams are passed successfully.		
Workload:	The workload is 150h. (20 working days)		

Data:	OMIS. MA. Nr. 2903 / Examination number: 60517	Version: 06.07.2016 	Start Year: WiSe 2016
Module Name:	Information Management		
(English):			
Responsible:	Felden, Carsten / Prof. Dr.		
Lecturer(s):	Felden, Carsten / Prof. Dr.		
Institute(s):	Institute of IManagement Information Systems		
Duration:	1 Semester(s)		
Competencies:	Students get a general view to understand integration of business and technology in companies. This course provides a comprehensive and integrative understanding of essential new technologies, information system applications, and their impact on business models and managerial decision making. From a managerial perspective, the course addresses an application of concepts regarding hardware, software, and data organization. The students will understand and apply basics of information systems with a focus on economic issues as well as the significance of information systems for companies and the practical information and communication technologies to increase the efficiency and effectiveness of information systems.		
Contents:	1. Introduction: the domain of business information systems 2. Organizations and systems 3. Data, information, and knowledge 4. Information systems, and organizational infrastructure 5. Communication infrastructure 6. ICT systems infrastructure 7. The business environment 8. Electronic business, electronic commerce, and electronic government 9. Assessing the use and impact of information systems 10. Planning, strategy, and management 11. Services, projects and operations 12. Information systems development 13. Successful informatics practice		
Literature:	Beynon-Davies, P.: Business Information System, Palgrave Macmilian edition 2, London, 2013 Bocij, P.: Business Information System, Global Edition, Pearson Education LTD, Harlow, 2014 Laudon, K.; Laudon, J.: Management Information Systems, edition 14, Pearson Education, Prentice Hall, 2015.		
Types of Teaching:	Lecture / Lectures (2 SWS) Recitation / Exercises (2 SWS)		
Pre-requisites:			
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA [90 min] Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min]		
Credit Points:	6		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 1]		
Workload:	The workload is 180h. It is the result of 60h attendance and 120h self-studies.		

Data:	InnoProGeom. MA. Nr. 3661 / Examination number: 30120	Version: 05.12.2018 	Start Year: WiSe 2019
Module Name:	Innovation Project Geomatics		
(English):			
Responsible:	Benndorf, Jörg / Prof. Dr.-Ing.		
Lecturer(s):	John, André / Dr.-Ing.		
Institute(s):	Institute for Mine Surveying and Geodesy		
Duration:	1 Semester(s)		
Competencies:	After successful completion of the module, students are able to: • create innovative solutions for a complex challenge in the context of geomatics for mineral resource management as result of a team effort, • apply their project management and interpersonal communication skills to achieve innovative solutions, • develop a concept for the scenario of a market entry for the created innovative solutions and • present and defend the solution in front of an expert panel.		
Contents:	A detailed challenge will be provided inspired by topics of current interest in the larger community of geomatics in mineral resource management. For the team-project, teams will be defined by the supervisor. The teams will conduct independent work supported by regularly scheduled audits, selected expert lectures and also the possibility of consulting experts. Teams have to manage their project work including tasks, schedules and team roles independently. A solution to the challenge has to be created by applying their knowledge gained in all modules taken before, extended by individual focused auto-didactical investigations. Given a scenario that the solution should be brought to the national and/or international market, a market entry plan has to be generated. The innovative solution and the market entry plan have to be presented in a consistent report and be defended in front of an expert panel assembled by the course coordinator.		
Literature:	Typical literature will be recommended by expert lecturers and/or has to be investigated independently.		
Types of Teaching:	S1 (WS): Innovation Seminar - Expert lectures, audits, consulting hours, independent group work / Seminar (2 SWS)		
Pre-requisites:	Mandatory: Abschluss von Modulen des Studiengangs im Umfang von mindestens 50 LP (Proof of the successful conclusion of at least 50 LPs/ECTS of mandatory, optional and free elective modules as defined in the study documents for the MSc in Geomatics for Mineral Resource Management.)		
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: AP*: Report on the innovation project AP*: Oral defense of the innovation project * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: AP*: Bericht zum Innovationsprojekt AP*: Mündliche Verteidigung zum Innovationsprojekt		

	* Bei Modulen mit mehreren Prüfungsleistungen muss diese Prüfungsleistung bestanden bzw. mit mindestens "ausreichend" (4,0) bewertet sein.
Credit Points:	10
Grade:	The Grade is generated from the examination result(s) with the following weights (w): AP*: Report on the innovation project [w: 2] AP*: Oral defense of the innovation project [w: 1] * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively.
Workload:	The workload is 300h. It consists of 30 hours audits, lectures and consulting hours, and 270 hours independent group work, report writing and preparation for examination.

Data:	EBAM. MA. Nr. 3697 / Examination number: 30713	Version: 14.03.2019 	Start Year: SoSe 2020
Module Name: (English):	Introduction to Bayesian Analysis with R		
Responsible:	Gerhards, Christian / Prof. Dr.		
Lecturer(s):	Tolosana-Delgado, Raimon / PD Dr.		
Institute(s):	Institute of Geophysics and Geoinformatics		
Duration:	1 Semester(s)		
Competencies:	The students will be familiarized with Bayesian methods and acquire the ability to apply these methods to geoscientific problems, using R.		
Contents:	- Bayes Theorem, Bayesian inversion, Bayesian trees - Probability models, conjugate distributions, discrete solutions - Markov Chain Monte Carlo methods: Gibbs sampling and Metropolis-Hastings		
Literature:	- Bolstad, William M., Curran, James Michael (2017) Introduction to Bayesian statistics, Wiley, ISBN: 978-1-118-59316-5 - Marin, Jean-Michel, Robert, Christian P. (2007) Bayesian core : a practical approach to computational Bayesian statistics, Springer, ISBN: 9780387389790		
Types of Teaching:	S1 (SS): Practical Application (2 SWS)		
Pre-requisites:	Recommendations: Data Analysis and Statistics, Multivariate Statistics and Geostatistics, basic knowledge of R		
Frequency:	yearly in the summer semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: AP: Programming project and project documentation Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: AP: Programmierprojekt und Dokumentation		
Credit Points:	3		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): AP: Programming project and project documentation [w: 1]		
Workload:	The workload is 90h. It is the result of 30h attendance and 60h self-studies. The latter comprises preparation for and follow-up of the lectures as well as the preparation of the programming project and project documentation.		

Data:	EARTHSY. BA. Nr. 748 / Examination number: 31014	Version: 03.05.2011 	Start Year: SoSe 2010
Module Name:	Introduction to Earth System Science		
(English):			
Responsible:	Lau, Maximilian / JProf.		
Lecturer(s):	Lau, Maximilian / JProf.		
Institute(s):	Institute of Mineralogy		
Duration:	1 Semester(s)		
Competencies:	Successful participants obtain an understanding for the complexity of environmental challenges, and for the individual parts of the geosphere and their interactions – the prerequisite for any responsible work in many environmental fields. In addition, the module assists in learning how to write short scientific communications.		
Contents:	The lecture covers the theoretical background of many typical tasks in environmental research and practice. Examples from all environmental compartments are being discussed from the initial concept via sampling to the interpretation of results. A complimentary seminar trains the participants to write scientific texts on lecture topics.		
Literature:	Berner EK, Berner RA (1996) Global environment. Water, air, and geochemical cycles. Prentice Hall; 376 p. Boeker E, van Grondelle R (2001) Environmental science. Types of Teaching:	S1 (SS): Lectures (2 SWS) S1 (SS): Incl. Excursion / Exercises (1 SWS)		
Pre-requisites:	Recommendations: None		
Frequency:	yearly in the summer semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA [90 min] AP: Written Essay AP: Written Essay Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min] AP: Schriftlicher Aufsatz AP: Schriftlicher Aufsatz		
Credit Points:	3		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 2] AP: Written Essay [w: 2] AP: Written Essay [w: 1]		
Workload:	The workload is 90h. It is the result of 45h attendance and 45h self-studies.		

Data:	MINING. MA. Nr. 2914 / Examination number: 31703	Version: 28.04.2010 	Start Year: WiSe 2010
Module Name:	Introduction to Mining		
(English):			
Responsible:	Drebenstedt, Carsten / Prof. Dr.		
Lecturer(s):	Drebenstedt, Carsten / Prof. Dr.		
Institute(s):	Institute of Mining and Special Civil Engineering		
Duration:	1 Semester(s)		
Competencies:	Basic knowledge in role of mining and mining engineering processes and relationship to other disciplines; Understanding of sustainable development in mining industry: balance between mining production, social development and environment protection.		
Contents:	Mining is one of the oldest and most important sectors in our civilisation building the backbone of many further industries. Developed economies highly dependent on mineral and energy imports. The world knows many wars about reserves and resources. Mining production employs million of workers worldwide and is especially in developing countries an important source of income. On other side mining has a great influence to the environment and social sphere. Mining is today a modern industry with high standard in working safety and environment protection. The largest machines the world knows are operating in open pit mines. The lecture introduces this interesting and important world of mining and gives an understanding for economic, social and technical processes. Case studies will illustrate the practical side of knowledge application.		
Literature:	Hartmann et al: SME Mining Engineering Handbook, Vol. 1 and 2, Society of Mining, Metallurgy and Exploration, Littleton, Colorado, actual edition Hustrulid, Kuchta: Open pit mine planning and design, Balkema, latest edition		
Types of Teaching:	S1 (WS): Lectures (1 SWS) S1 (WS): Exercises (1 SWS)		
Pre-requisites:	Recommendations: No requirements.		
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA [90 min] Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min]		
Credit Points:	3		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 1]		
Workload:	The workload is 90h. It is the result of 30h attendance and 60h self-studies.		

Data:	MScGeomMRM. MA. Nr. 3662 / Examination number: -	Version: 05.12.2018 	Start Year: SoSe 2020
Module Name:	MSc Thesis Geomatics for Mineral Resource Management		
(English):			
Responsible:	Benndorf, Jörg / Prof. Dr.-Ing.		
Lecturer(s):	Benndorf, Jörg / Prof. Dr.-Ing.		
Institute(s):	Institute for Mine Surveying and Geodesy		
Duration:	5 Month(s)		
Competencies:	The students will demonstrate the ability to independently solve a specific complex scientific or engineering task in the field of geomatics for mineral resource management. This includes the typical steps • definition of detailed objectives and research questions, • definition of a project plan to solve these questions, • a suitable choice and justification of methods for data acquisition, analysis or modelling, • the application to the task defined and • a critical interpretation of results. The student will be able to present the results and the scientific argumentation in a consistent MSc thesis report and presentation to their peers in form of a public MSc thesis defense.		
Contents:	Authorship and editing of a scientific publication in form of a MSc thesis report, including • task analysis and definition of goal and objectives, • design of a work plan tailored to achieve the goal and objective defined, • review of the state of the art related to the topic, • presentation and justification of methods used to achieve the goal and objectives, • conducting numerical or in-situ experiments, measurements, numerical calculations, simulations etc., • analysis and interpretation of results, • summary and • recommendations and potentially generalization of results. MSc thesis guidelines of TU Bergakademie Freiberg have to be considered for the report. The public defense will be in form of a 25 minutes' presentation followed by a detailed discussion on the topic.		
Literature:	Guideline for the preparation of scientific thesis at TU Bergakademie Freiberg from 27.06.2005, DIN 1422, part 4 (08/1985); Recommendations for task specific literature will be provided by the supervisor.		
Types of Teaching:	S1: Independent work on a scientific or engineering task / Thesis		
Pre-requisites:	Mandatory: Abschluss von Modulen der Vertiefung im Umfang von 80 LP, darunter alle Pflichtmodule der Vertiefung. (Proof of the successful conclusion of modules totalling 80 CP of the specialization, thereof all mandatory modules.		
Frequency:	constantly		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: AP*: MSc thesis report		

	AP*: MSc thesis colloquium * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: AP*: Masterarbeit AP*: Kolloquium * Bei Modulen mit mehreren Prüfungsleistungen muss diese Prüfungsleistung bestanden bzw. mit mindestens "ausreichend" (4,0) bewertet sein.
Credit Points:	30
Grade:	The Grade is generated from the examination result(s) with the following weights (w): AP*: MSc thesis report [w: 2] AP*: MSc thesis colloquium [w: 1] * In modules requiring more than one exam, this exam has to be passed or completed with at least "ausreichend" (4,0), respectively.
Workload:	The workload is 900h. It consists of independent investigations, consultations, thesis preparation, colloquium preparation and presentation.

Data:	PGEODAT. MA. NR. 139 / Examination number: 30712	Version: 07.10.2019 	Start Year: WiSe 2020

(English):	Multivariate Statistics and Geostatistics		
Responsible:	Gerhards, Christian / Prof. Dr.		
Lecturer(s):	Gerhards, Christian / Prof. Dr. Tolosana-Delgado, Raimon / PD Dr.		
Institute(s):	Institute of Geophysics and Geoinformatics		
Duration:	1 Semester(s)		
Competencies:	The students will obtain a deepened knowledge on theoretical aspects of multivariate geodata analysis as well as practical experience by application of the methods to actual data sets and interpretation of the results.		
Contents:	- theoretical concepts of geodata modeling - methods of multivariate statistics (e.g., analysis of variance, principal component analysis) - geostatistical interpolation and simulation Depending on the audience, the lecture can be held in German.		
Literature:	Chilès, J.-P., Delfiner, P., 2012, Geostatistics - Modeling Spatial Uncertainty, 2nd Ed., Wiley Schabenberger, O., Gotway, C.A., 2005, Statistical Methods for Spatial Data Analysis, Taylor & Francis Sama, D.D., 2009, Geostatistics with Applications in Earth Sciences, 2nd Ed., Springer		
Types of Teaching:	S1 (WS): Lectures (2 SWS) S1 (WS): Exercises (2 SWS) S1 (WS): Practical Application (2 SWS)		
Pre-requisites:	Recommendations: Introductory lecture on data analysis/statistics, Mathematics for Engineers 1 + 2		
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: AP: Project and project documentation Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: AP: Projekt und Projektdokumentation		
Credit Points:	9		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): AP: Project and project documentation [w: 1]		
Workload:	The workload is 270h. It is the result of 90h attendance and 180h self-studies.		

Data:	OPMAN. MA. Nr. 2970 / Examination number: 61304	Version: 06.07.2015 	Start Year: WiSe 2016
Module Name:	Operations Management		
(English):			
Responsible:	Höck, Michael / Prof. Dr.		
Lecturer(s):	Höck, Michael / Prof. Dr.		
Institute(s):	Professor of Industrial Management, Production Management and Logistics		
Duration:	1 Semester(s)		
Competencies:	Foremost, the module aims to convey to the student problem-solving competencies with a view to putting the student in a position to analyse the complex questions in operations management, to structure them, and to develop solution alternatives.		
Contents:	This course addresses the management of operations in manufacturing and service firms. Diverse activities, such as determining the size and type of production process, purchasing the appropriate raw materials, planning and scheduling the flow of materials and the nature and content of inventories, assuring product quality, and deciding on the production hardware and how it gets used, comprise this function of the company. Managing operations well requires both strategic and tactical skills. During the term, we will consider such topics as: process analysis, workforce issues, materials management, quality and productivity, technology, and strategic planning, together with relevant analytical techniques. This course will provide a survey of these issues.		
Literature:	Davis, M. & Heineke, J. (2005): Operations Management, 5/e, McGraw-Hill Cachon & Terwiesch (2006): Matching Supply and Demand, McGraw-Hill Stevenson (2007): Operations Management, 9/e, McGraw-Hill.		
Types of Teaching:	S1 (WS): Lectures (2 SWS) S1 (WS): Exercises (2 SWS)		
Pre-requisites:	Recommendations: None		
Frequency:	yearly in the winter semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA [90 min] PVL: Case Studies PVL have to be satisfied before the examination. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min] PVL: Fallstudien PVL müssen vor Prüfungsantritt erfüllt sein bzw. nachgewiesen werden.		
Credit Points:	6		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 1]		
Workload:	The workload is 180h. It is the result of 60h attendance and 120h self-studies. Self-study consists of preparation and review of the lectures, independent work on case studies, as well as preparation for the written test.		

Data:	OREDEP. MA. Nr. 2915 / Examination number: 31201	Version: 28.04.2010 	Start Year: SoSe 2011
Module Name:	Ore Deposits & Economic Geology		
(English):			
Responsible:	Seifert, Thomas / Prof. Dr.		
Lecturer(s):	Seifert, Thomas / Prof. Dr.		
Institute(s):	Institute of Mineralogy		
Duration:	1 Semester(s)		
Competencies:	Offering engineers and non-geoscientists the opportunity to get some background knowledge on the genesis of ore deposits and resulting implications for exploration and processing.		
Contents:	An introduction to ore-forming environments. Major case studies of ore and industrial mineral deposits will also be discussed. An integral part of the course is the study of hand specimens.		
Literature:	Evans, A. M. (1993). Ore Geology and Industrial Minerals, Oxford: Blackwell. Guilbert, J.M. and Park, C.F. (1986). The Geology of Ore Deposits, New York: Freeman. Kesler, E. (1994) Mineral Resources, Economics and the Environment, New York: Macmillan.		
Types of Teaching:	S1 (SS): Lectures (1 SWS) S1 (SS): Exercises (1 SWS)		
Pre-requisites:	Recommendations: No requirements.		
Frequency:	yearly in the summer semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA [90 min] Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min]		
Credit Points:	3		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 1]		
Workload:	The workload is 90h. It is the result of 30h attendance and 60h self-studies.

Modulname:	Photogrammetrie		
(englisch):	Photogrammetry		
Verantwortlich(e):	Benndorf, Jörg / Prof. Dr.-Ing.		
Dozent(en):			
Institut(e):	Institut für Markscheidewesen und Geodäsie		
Dauer:	1 Semester		
Qualifikationsziele / Kompetenzen:	Verständnis der geometrischen und der technischen Grundlagen der Gewinnung geometrischer Informationen durch flächenhafte Abtastung. Methodenkompetenz zur bildvermittelten Bestimmung geometrischer Größen und ihrer Fehlermaße mit Hilfe kalibrierter Spezialkameras und mit Amateurkameras. Fähigkeit zur Bewertung photogrammetrischer Werkzeuge und Produkte.		
Inhalte:	Geometrische Grundlagen der Erzeugung digitaler Bilder und ihre technische Realisierung in verschiedenartigen photogrammetrischen Messkameras, in Sensoren der Fernerkundung und in Amateurkameras; metrische 2D- und 3D-Auswertung; Techniken der Bildzuordnung. Der Schwerpunkt liegt im Bereich der terrestrischen Photogrammetrie unter Verwendung von Methoden aus dem Bereich Computer Vision. Erzeugen einer 3D-Punktwolke, Analyse und Bewertung ihrer Genauigkeit. Internationale Fachliteratur wird behandelt.		
Typische Fachliteratur:	Luhmann, T.: Nahbereichsphotogrammetrie. Heidelberg; Kraus, K.: Photogrammetrie. Berlin Förstner, W. & B. P. Wrobel: Photogrammetric Computer Vision. Springer 2016 Hartley, R. & Zissermann: A.: Multiple View Geometry in Computer Vision. Cambridge;		
Lehrformen:	S1 (WS): Photogrammetrie - nur im geraden Wintersemester / Vorlesung (2 SWS) S1 (WS): Photogrammetrie - nur im geraden Wintersemester / Übung (1 SWS)		
Voraussetzungen für die Teilnahme:	Empfohlen: Einführung in die Informatik, 2009-06-02 Höhere Mathematik für Ingenieure 1, 2009-05-27 Höhere Mathematik für Ingenieure 2, 2009-05-27 Matrizenrechnung, Vektoralgebra, Analysis, Fähigkeit und Möglichkeit zur Erstellung einfacher Computerprogramme für die Bildbearbeitung, Ausgleichsrechnung, Grundvorstellungen projektiver Geometrie von Vorteil		
Turnus:	alle 2 Jahre im Wintersemester		
Voraussetzungen für die Vergabe von Leistungspunkten:	Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: MP [20 bis 30 min] PVL: Belege PVL müssen vor Prüfungsantritt erfüllt sein bzw. nachgewiesen werden.		
Leistungspunkte:	4		
Note:	Die Note ergibt sich entsprechend der Gewichtung (w) aus folgenden(r) Prüfungsleistung(en): MP [w: 1]		
Arbeitsaufwand:	Der Zeitaufwand beträgt 120h und setzt sich zusammen aus 45h Präsenzzeit und 75h Selbststudium.		

Data:	OMIS. MA. Nr. 3202 / Examination number: 62101	Version: 11.01.2017 	Start Year: WiSe 2010
Module Name:	Project Management		
(English):			
Responsible:	Jacob, Dieter / Prof. Dr.		
Lecturer(s):	Müller, Clemens / Master		
Institute(s):	Professor of Construction Management		
Duration:	1 Semester(s)		
Competencies:	Students obtain an understanding of the concept of project management and become familiar with important tasks in relation to the management of projects.		
Contents:	This course presents the principles and techniques of managing projects, primarily engineering projects, from the owner's feasibility study through design and development to completion. It emphasises project management during the early stages of project development because it is at that point that the ability to influence the quality, cost and time of a project is at its highest. It includes project scope definition, development of work plan, planning and scheduling, procurement strategies and highlights the management of the three basic components of a project: quality/scope, budget/cost and time/schedule. A simulation exercise is included to demonstrate working in a group and highlight the importance of communication against a backdrop of determining procurement strategy.

Module Name:	Project Risk Management		
(English):			
Responsible:	Wiens, Marcus / Prof. Dr.		
Lecturer(s):	Wiens, Marcus / Prof. Dr.		
Institute(s):	Professor of Innovation and Risk Management		
Duration:	1 Semester(s)		
Competencies:	After successful completion of the module, students should be able to explain the context, rationale, strategy and tactics of project management with emphasis on the importance of project planning and project risk management by identifying and examining critical project phases and conditions. The course enables the participants to apply project management skills to projects in a variety of industries and disciplines with a strong focus on the complexities and problem constellations of mega projects, but also information technology, procurement & maintenance projects. By focussing on providing knowledge in core areas of risk analysis, time, cost and quality, the participants are able to confidently deal with the ever growing complexities and challenges of project management.		
Contents:	The module starts with a systematic overview of the principles of project management. The module covers the areas of project scope management, time management and resource scheduling as well as cost & quality management primarily from a risk-oriented perspective. The module applies methods such as model-based and statistical risk analysis, decision-theoretic analyses, Monte-Carlo-simulations as well as behavioral and game-theoretic approaches to understand incentives, decision biases and public acceptance. Finally, the module derives conclusions for efficient risk management policies for complex projects.

Types of Teaching:	S1 (SS): Lectures (2 SWS) S1 (SS): Exercises (2 SWS)		
Pre-requisites:			
Frequency:	yearly in the summer semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: KA [90 min] Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: KA [90 min]		
Credit Points:	6		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): KA [w: 1]		
Workload:	The workload is 180h. It is the result of 60h attendance and 120h self-studies.		

Data:	BBREKL. MA. Nr. 2087 / Examination number: 31719	Version: 13.07.2014 	Start Year: SoSe 2014
Module Name:	Reclamation		
(English):			
Responsible:	Drebenstedt, Carsten / Prof. Dr.		
Lecturer(s):	Drebenstedt, Carsten / Prof. Dr.		
Institute(s):	Institute of Mining and Special Civil Engineering		
Duration:	1 Semester(s)		
Competencies:	The module provides the development of expertise and methodological skills in the field of mining engineering. The students learn the theory and practice of reclamation in mining as essential element of balance for mining impacts. They understand the parallelism of mine and reclamation planning and the fact, why reclamation can exceed the mine project phase. Additionally the students will be qualified to explain scientifically reclamation measures, plan technical measures and calculate the financial expenses.		
Contents:	- Impacts of mining and its effects - Legal requirements for permission - Scientific fundamentals of reclamation (soil, ground water balance,...) - Utilization requirements and realization in the post-mining landscaping (agriculture, forestry, waterbodies, nature protection, recreation, miscellaneous) - Concepts, Case studies		
Literature:	Pflug (Hrsg.), 1998, Braunkohlentagebau und Rekultivierung, Springer Verlag Olschowy, Bergbau und Landschaft, 1993, Paray Verlag Gilscher, Bruns, 1999, Renaturierung von Abbaustellen, Verlag Eugen Ulmer Stuttgart		
Types of Teaching:	S1 (SS): Lectures (3 SWS) S1 (SS): Exercises (2 SWS) S1 (SS): Practical Application (1 SWS)		
Pre-requisites:	Recommendations: Mathematical-scientific fundamentals		
Frequency:	yearly in the summer semester		
Requirements for Credit Points:	For the award of credit points it is necessary to pass the module exam. The module exam contains: MP/KA (KA if 21 students or more) [MP minimum 30 min / KA 60 min] PVL: Submission and positive evaluation of module exercises PVL: Participation in 2 excursions of the chair Surface-Mining PVL have to be satisfied before the examination. Voraussetzung für die Vergabe von Leistungspunkten ist das Bestehen der Modulprüfung. Die Modulprüfung umfasst: MP/KA (KA bei 21 und mehr Teilnehmern) [MP mindestens 30 min / KA 60 min] PVL: Erfolgreicher Abschluss der Übungsaufgaben PVL: 2 Fachexkursionen Tagebau PVL müssen vor Prüfungsantritt erfüllt sein bzw. nachgewiesen werden.		
Credit Points:	6		
Grade:	The Grade is generated from the examination result(s) with the following weights (w): MP/KA [w: 1]		
Workload:	The workload is 180h. It is the result of 90h attendance and 90h self-studies. Self-study includes autonomous and instructed preparation and performance of follow-up course work and examination preparation.		

Daten:	RISS. BA. Nr. 636 / Prüfungs-Nr.: 30110	Stand: 14.11.2017 	Start: SoSe 2019
