

Implementation of mandatory testing according to the Saxon Corona Protection Ordinance

As of 26 July 2021 and according to Section 9 (1a) and (8) of the Saxon Corona Protection Ordinance (SächsCoronaSchVO), employees who have not been in the office (at work) for at least five consecutive working days due to holidays and comparable leaves from work or duty must present a same-day proof of testing or proof of vaccination to the employer on the first working day after their time absent or carry out a documented and supervised test on the first day of work. If work is resumed in the home office, this obligation applies to the first day on which the work takes place in the office or any other work location outside of the employee's own home.

The same-day test **must not have been carried out more than 24 hours before start of work by an official testing centre, medical or dental surgery or other official testing centre.**

Mandatory testing is applicable in case the employee has been off work for five consecutive working days or more due to holidays or compensatory time-off. It does not apply, however, if the absence is caused by sickness, "child sickness", home office, business trips or further education.

Employees must contact the Dean's Office or the respective heads of the central facilities upon their first working day and notify them of their return.

In the context of the return notification, employees must provide proof of

- a. a full vaccination against SARS-CoV-2 (proof of vaccination or digital proof),
- b. recovery (appropriate PCR testing result or medical certificate); or
- c. a same-day test from an approved testing centre

to be presented in person for reference or in exceptional cases

- d. to carry out an antigen self-test under the supervision of an above-mentioned body.

Health data will not be stored or otherwise documented.

The implementation of the testing according to letter d) must be documented (official form enclosed). The form must be provided to the employee. Any further documentation or data storage by the department (copy of the form or similar) does not take place.

In addition, please also refer to the FAQ of the Saxon Ministry of Social Affairs and Social Cohesion "SMS" "Answers to frequently asked questions on the mandatory testing for the detection of SARS-CoV-2 coronavirus according to the Saxon Corona Protection Ordinance" at www.coronavirus.sachsen.de.

Further questions will be answered by coronaschutzbeauftragte@zuv.tu-freiberg.de or Dezernat.3@zuv.tu-freiberg.de

Enclosure

- For official use only -

**Dokumentation der Durchführung eines beaufsichtigten Antigen-Selbsttests
zum Nachweis des SARS-CoV-2 Virus
(„Urlaubsrückkehrer“)**

gem. § 9 Abs. 1 a) SächsCoronaSchVO i. d. F. vom 14.07.2021

The following person was tested for SARS-CoV-2 coronavirus under supervision on the first working day after returning to the office following an absence of at least five consecutive working days (Mon-Sat) due to leave or comparable leave from work or duty.

Person tested:

.....
Name, first name

.....
Organisational unit

Coronavirus Antigen Self-Test

.....
Name of test

.....
Manufacturer

Test date/time:

.....

Test result:

Test result negative

positive

Confirmation of the correct testing procedure and the test result by the supervisor:

.....
Date and signature of the supervisor
