

The Partner university

## **Wuhan University of Science and Technology (WUST)**

currently offers two options for visiting students:

- 1 Staying at WUST for one semester (September through January) and earn 30 ECTS points by reading five modules. Those modules are taught entirely in English language and are offered to exchange students (currently mainly IBDEM) only. This offers teaching in a small group with very direct contact to hand-selected teachers with syllabus that we have checked.  
Students would then return to Freiberg for their final semester (internship and Master thesis) and earn the Freiberg MBA.
- 2 Staying at WUST for one whole year (September through November) and earn 58 ECTS points by reading 7 modules and doing their internships in the Hubei area and writing their master thesis under the supervision of WUST-staff.  
Students would then be eligible to the Freiberg MBA and get acknowledgement by WUST that they have done sufficient effort to earn a Chinese WUST – MBA certificate, as soon as this is signed by Beijing.

This would then effect a double degree (Freiberg and Wuhan) that you would be able to earn. We are proud to say that this is a unique option only offered by us and one more German university.

WUST currently offers 7 core modules that are taught in English language.

Of the modules offered, the following four are in the autumn term:

- (i) Modern Chinese (Wei Ming, Associate Professor);
- (ii) Corporate Governance of Chinese Firms (Ye Pei, Associate Professor);
- (iii) International Trade Frictions that Confront China (Zheng Yueming, Associate Professor); and
- (iv) Chinese Innovation Policy and the Comparison with other Countries (Huang Tao, Associate Professor).

One module runs during the autumn and the spring terms:

- (v) A Survey of China and Its Culture: A Cross-Culture Perspective (Dianlei Geng, Associate Professor).

Two modules are offered in the spring term:

- (vi) Foreign Direct Investment in China (Deng Lihua, Associate Professor);
- (vii) Marketing (Zhang Mingli, Associate Professor).

This offer is subject to change.

In each of the modules offered by WUST, students can earn 6 ECTS points.
