

IVC seeks interns /
working students
(m/f/d) as data analyst
in application
development

What it means to be an intern or a working student with us:

What you can expect:

- / As a data analyst you develop complex algorithms for the analysis of big data in the field of valuation and the capital market
- / You support our projects comprehensively through the modeling, processing and visualization of data
- / The focus is on the further development of our applications - you will work closely together with a team of data analysts and valuation specialists

What you bring as a student:

- / Academic studies in computer science, mathematics, statistics, physics or a similar field
- / Experience in the field of programming / Big Data (e.g. Python, JAVA, VBA, R)
- / Interest in data processing and workflow management tools (e.g. KNIME)
- / Basic knowledge of Excel and PowerPoint and interest in analysis and visualization tools such as PowerBI

What we offer you:

- / A varied internship with a subsequent permanent employment as a working student
- / Opportunity for "combined" studies with a secure income
- / Flexible working models (i.a. also Home Office) possible
- / Well structured training in the above-mentioned fields of work (e.g. seminars)
- / Challenging projects and steep learning curve in a motivated and supportive team
