The 10th Lomonossow Dialogue is proud to have Prof. Dr. Yong Wang Li, founder and CEO of Synfuels China Technology Co., Ltd – the global leading provider of Fischer-Tropsch (TP) synthesis – as its guest speaker in Freiberg.

Synfuels China has more than 1 000 employees and is the technology provider for the world's largest coal-based FT plant in Ningxia, China, which has an annual capacity of 4 million tons of FT products. In his talk on “Fischer-Tropsch Synthesis Fundamentals & Engineering Practices”, Prof. Li presented the progress of Synfuels China in this field and shared insights obtained through numerous major industry applications.

Besides his extensive industry experiences, Prof. Li also possesses an outstanding academic vita. His scientific accomplishments are reflected by the more than 200 publications, over 60 patents, and a software-package for FT synthesis. His achievements have also been honored through several science and innovation awards.

From 1999 to 2000, Prof. Li was a Humboldt scholar at the University of Erlangen-Nuremberg. Since then, he has maintained close scientific contact with research institutes in Germany which is reflected in Synfuels China's long-term R&D collaboration with the Institute of Energy Process Engineering and Chemical Engineering (IEC) at TU Bergakademie Freiberg in the field of carbon conversion and syngas production. Synfuels China was also the co-organizer of the 2015 International Freiberg Conference on IGCC & XtL Technologies in Hohhot, China with IEC. Thus, the TU Bergakademie Freiberg is honored to have a renowned and leading scientist and industry leader such as Prof. Li as speaker at the Lomonossow Dialogue.

The event on 29th May 2018 was attended by invited international experts and industry leaders as well as German scholars from TU Bergakademie Freiberg in the fields of natural sciences and engineering. Once again, the Lomonossow Dialogue has provided a platform for intense exchanges at the highest scientific level.

At the end of his visit, Prof. Dr. Yong Wang Li met with the Rector of Freiberg University, Prof. Dr. Klaus-Dieter Barbknecht.
