

Dashboard in a Day (DIAD) using Microsoft PowerBI

What is PowerBI? Microsoft Power BI is a suite of business analytics tools to analyze data and share insights. Monitor your business and get answers quickly with rich dashboards available on every device. Unlike competitive products PowerBI comes in the basic version for free.

**Your whole business on
one dashboard**

With DIAD training you get practical hands-on experience and learn:

- How to connect to, import and transform data from a variety of sources
- Build real data models, author and publish business intelligence reports
- Customize and share your “creations” for collaboration with other groups securely inside your organization including mobile device sharing

**Create stunning
interactive reports**

**Consistent analysis across
your organization**

Target audience: No experience with business intelligence necessary. Please be aware that space is limited to 20 attendees.

When: 1st February 2017, 8am – 5pm

Where: PC Pool Silbermannstraße 2, 09599 Freiberg

Price: Free admission

Registration: Reserve a seat via <mailto:Carsten.Felden@bwl.tu-freiberg.de>
